

Amberg Engineering Switzerland

Amberg Engineering is a successful engineering enterprise operating internationally with outstanding, long-term experience in underground engineering and specialised underground construction. More than 200 committed employees in Switzerland and abroad ensure high-quality project handling.

To strengthen our team in Regensdorf, Chur and Sargans we seek to fill the following position immediately:

BIM Functional Manager

Job description:

- Manage the BIM department across all locations (CH, AT, NO, ES, CZ)
- Ensure internal development of BIM method and competences of employees
- Ensure knowledge management around BIM topics and digitalisation
- Ensure projects are state of the art
- Execution of internal Projects
- Support for personnel recruitment and development
- Support in creation of the sales budget
- Support in acquisition and customer care

Your profile:

- Completed apprenticeship as a draughtsperson (EFZ) / designer / architect / engineer with further education in BIM
- Several years of work experience
- Good knowledge of 2D/3D AutoCAD as well as other modelling software (Rhino, Dynamo, Revit, Grasshopper)
- Good knowledge of 5D BIM as well as information and data management
- Interest in best using existing software, enhancing it whenever required, and testing new software/workflows
- Interest in contributing to work on international large-scale projects
- Good interpersonal skills and ability to work independently and as a member of an effective team
- Flexible attitude
- Excellent knowledge of German and English both written and verbal

Your future work environment:

We will entrust you with challenging tasks and allow you a high degree of independence and personal initiative. You will receive comprehensive training and work with modern hardware and software in a motivated team.

Interested to go for this challenge? We would be pleased to receive your complete application at job@amberg.ch.
