

Amberg Technologies Ltd is a leading provider of integrated measuring system solutions for recording and analysis of structural information in the infrastructure sector. Sound knowledge and a consistent focus of business activities on the area of infrastructure construction, especially tunnel and railway construction, generate high-quality system solutions known all over the world. Amberg Technologies Ltd is a Swiss enterprise which operates globally as a company of the Amberg Group

At our location in Regensdorf, we seek to fill the following position to support the area of railways:

Geomatics Engineer for Rail System Support (m/f) 100%

Job description:

- Support of Sales in client acquisition
- Organize and conduct product presentations and provide project support
- Contact person in technical matters for Sales and potential clients
- Client support in verbal and written form
- Organize and conduct client training sessions on site including creation of training materials
- Interface between market/client requirements and product management/development

Secondary you will support system development in the area of requirements engineering and assist in the development phase as a contact person for technical matters. Conducting system tests and system validations as well as the creation of product documentation will round out your multifaceted responsibilities.

Your ideal profile:

- Completed training/course of studies in the area of surveying/geomatics (e.g. geomatics engineer, surveying technician, or similar)
- Young professional or some years of work experience in a comparable function in surveying work
- Affinity for product development in the area of system engineering
- Willingness to travel (approx. 30% worldwide travel)
- Very good written and spoken command of German and English
- Ideally, you will have a background in the surveying sector

A motivated team awaits you along with a multifaceted and challenging position offering a great deal of latitude in a successful, family enterprise with international operations.
