NEW DISTRIBUTION AGREEMENT FOR THE US AND CANADA MARKET PROVIDES EASIER ACCESS TO INNOVATIVE RAILWAY SURVEYING SOLUTIONS AND FACTORY-CERTIFIED SERVICE

(Regensdorf, 22 August 2018) – Amberg Technologies, the world's leading specialist for innovative and user-friendly surveying solutions, today announced that Hexagon's Geosystems division has been appointed to distribute and support the complete range of Amberg Technologies rail surveying products and services in order to further expand Amberg's sales network in the US and Canadian markets.

Under the new agreement, Hexagon will enhance its rail industry offerings in the US and Canada by adding sales distribution, technical support, and repair and calibration services for the full line of Amberg's rail surveying products.

"With Hexagon, we have found a strong and experienced partner for the representation and resale of our rail surveying solutions in the U.S. and Canada market," said Stefan Basler, head of sales and marketing at Amberg Technologies Ltd. "We are pleased to support the rail industry by making innovative solutions easier to access."

"As the rail industry transitions to full digitalization, companies are seeking accurate measurement and mapping solutions that enable them to visualize, assess and make smart decisions to improve operations and minimize risks," said Brian Daniel, rail segment manager for Hexagon's Geosystems division, U.S. and Canada. "Amberg Technologies' railway surveying solutions are widely recognized for their automation as well as their outstanding quality and reliability. This new agreement gives the U.S. and Canadian rail industry a single comprehensive resource for all their measurement and mapping needs."
